

DB 300 ACCESSORIES

CA 300

For those artists who must share studio space, the CA 300 Curtain Assembly creates a darkroom effect on the drawing board by easily attaching to the projector and surrounding the work area. The darkroom environment allows clearer, crisper images which may otherwise distort from ambient lighting.

TI 300

For use with transparencies, 70mm and 35mm slides, the TI 300 attaches to the copyboard for three times enlargement on the table top, eight times enlargement on the floor as well as eighteen times enlargement onto a vertical surface.
